OVERVIEW

Our attorneys are regularly called upon to provide corporate and transactional legal guidance to for-profit and nonprofit entities in the health care and life sciences industry, including physician organizations, pharmacies, and health care industry services providers. Our corporate attorneys strive to work as members of a client's business team, offering strategic, comprehensive, and pragmatic guidance and cost-effective solutions.

We routinely assist with all aspects of health care businesses, including the drafting, review and negotiation of managed care contracts, provider-based hospital contracts, vendor agreements, real estate documents, medical equipment leases, pharmaceutical benefit manager (PBM) and network agreements, employment agreements, and stock agreements.
