OVERVIEW

Professional licenses and certifications are the life-blood of any healthcare provider. Whether you are a practitioner, medical practice, vendor, long-term care facility, pharmacy, or hospital, it is critical to understand which professional credentials are required and, when problems arise, how to most effectively manage risk and promptly resolve compliance issues. Our attorneys have years of experience before state and federal credentialing and enforcement bodies, including Indiana's Professional Licensing Agency and the DEA, FDA, and DOJ.
