OVERVIEW

Our knowledge of health care regulations and risk management can help you identify best practices for complying with the vast number of applicable state and federal health care regulations, including physician self-referral (“Stark”) laws, fraud and abuse laws, HIPAA and the HITECH Act, Medicare and Medicaid coverage and reimbursement requirements, various privacy laws, and controlled substance regulations. We can also help you mitigate risks, manage litigation, respond to inspections and audits, and negotiate on your behalf with government agencies like Indiana’s Department of Family and Social Services, Professional Licensing Agency, Department of Homeland Security as well as the USDEA, USFDA, the Health and Human Services Office of Inspector General, and the US Department of Justice.
